Main Success Scenario

1. The Student Founder submits evidence for a milestone.
2. The system marks the milestone as Evidence Submitted and notifies the Faculty Committee.
3. A Faculty Committee member opens and reviews the evidence.
4. The reviewer checks the evidence against the milestone criteria.
5. The reviewer selects **Approve** and may add comments.
6. The system records the decision with the reviewer and timestamp.
7. The system marks the milestone as Approved and calculates the tranche amount.
8. The system sends the disbursement request to the Payment Gateway.
9. The Payment Gateway confirms the transfer. The system records the payment and marks the milestone as Released.
10. The system notifies the Student Founder and backers.

Alternate Flow: Evidence Rejected / More Info

1. The reviewer finds that the evidence does not meet the milestone criteria.
2. The reviewer selects Reject or Request More Info and adds comments.
3. The system updates the milestone status. No funds are transferred.
4. The Student Founder is notified. If more information is requested, new evidence can be submitted.

5. If rejected, the funds remain held until the issue is resolved.

Business Rules

- Only one final authorized decision determines the milestone outcome, but earlier decisions remain in the audit log.
- Funds for a rejected milestone stay in the campaign's held-funds balance.
- The tranche must be released within 3 business days after approval.
