

Exception Flow Document

PS#40 – Student Startup Crowdfunding Platform
Use Case: UC-05 – Release Tranche Funds upon Milestone Approval

1. Purpose

This document describes the exception and alternate flows associated with the milestone evidence review in UC-05. Funds are released only after the milestone has been approved by the Faculty Committee.

2. Exception Flows

Flow	Condition	System / Actor Response
A1 – Evidence Rejected	Submitted milestone evidence does not satisfy the required criteria.	The Faculty Committee rejects the milestone. The Student Founder is notified and the tranche funds are not released.
A1a – More Information Requested	The evidence is insufficient, but the committee requires additional information before making a final decision.	The Faculty Committee requests more information. The Student Founder provides or resubmits the required evidence. The milestone is reviewed again.
A1b – Formal Rejection	The milestone is formally rejected after review.	The Student Founder is notified of the rejection. No tranche funds are released.
A1c – Appeal	The Student Founder disputes the rejection.	Appeal handling is outside the scope of UC-05.

3. General Exception Rule

If milestone evidence is not approved, the system must not release the corresponding tranche funds. The Student Founder is informed of the outcome and, where more information is requested, may resubmit evidence for another review.

4. Scope Note

The exception flows above are limited to the milestone review and fund-release process described in UC-05. Appeal handling is explicitly outside the scope of UC-05.
